1. Precautions

1-1. Safety Precautions

Follow these safety, servicing and ESD precautions to prevent damage and to protect against potential hazards such as electrical shock.

1-1-1. Warnings

1. For continued safety, do not attempt to modify the circuit board.
2. Disconnect the AC power and DC power jack before servicing.

1-1-2. Servicing the LED/LCD TV

1. When servicing the LED/LCD TV, Disconnect the AC line cord from the AC outlet.
2. It is essential that service technicians have an accurate voltage meter available at all times.
Check the calibration of this meter periodically.

1-1-3. Fire and Shock Hazard

Before returning the LED/LCD TV to the user, perform the following safety checks:

1. Inspect each lead dress to make certain that the leads are not pinched or that hardware is not lodged between the chassis and other metal parts in the LED/LCD TV.
2. Inspect all protective devices such as nonmetallic control knobs, insulating materials, cabinet backs, adjustment and compartment covers or shields, isolation resistorcapacitor networks, mechanical insulators, etc.
3. Leakage Current Hot Check (Figure 1-1):

WARNING : Do not use an isolation transformer during this test.

Use a leakage current tester or a metering system that complies with American National Standards Institute (ANSI C101.1, Leakage Current for Appliances), and Underwriters Laboratories (UL Publication UL1410, 59.7).

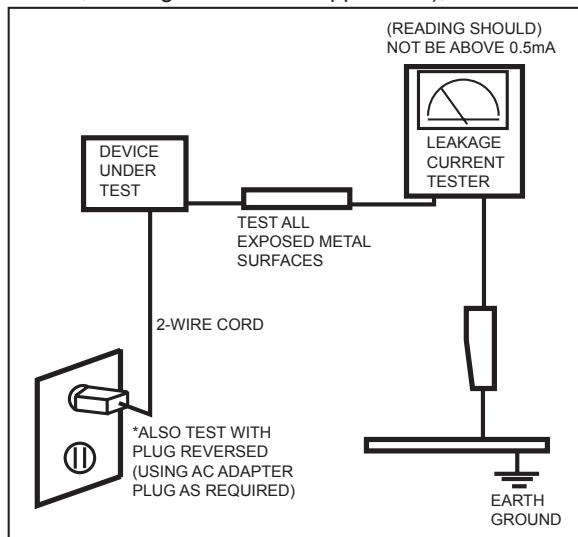

Figure 1-1. Leakage Current Test Circuit

4. With the unit completely reassembled, plug the AC line cord directly into a 120V AC outlet. With the unit's AC switch first in the ON position and then OFF, measure the current between a known earth ground (metal water pipe, conduit, etc.) and all exposed metal parts, including: metal cabinets, screwheads and control shafts.
The current measured should not exceed 0.5 milliamp.
Reverse the power-plug prongs in the AC outlet and repeat the test.

1-1-4. Product Safety Notices

Some electrical and mechanical parts have special safetyrelated characteristics which are often not evident from visual inspection. The protection they give may not be obtained by replacing them with components rated for higher voltage, wattage, etc. Parts that have special safety characteristics are identified by  on schematics and parts lists. A substitute replacement that does not have the same safety characteristics as the recommended replacement part might create shock, fire and/or other hazards. Product safety is under review continuously and new instructions are issued whenever appropriate.

1-2. Servicing Precautions

WARNING: An electrolytic capacitor installed with the wrong polarity might explode.

Caution: Before servicing units covered by this service manual, read and follow the Safety Precautions section of this manual.

Note: If unforeseen circumstances create conflict between the following servicing precautions and any of the safety precautions, always follow the safety precautions.

1-2-1 General Servicing Precautions

1. Always unplug the unit's AC power cord from the AC power source and disconnect the DC Power Jack before attempting to:
(a) remove or reinstall any component or assembly, (b) disconnect PCB plugs or connectors, (c) connect a test component in parallel with an electrolytic capacitor.
2. Some components are raised above the printed circuit board for safety. An insulation tube or tape is sometimes used. The internal wiring is sometimes clamped to prevent contact with thermally hot components. Reinstall all such elements to their original position.
3. After servicing, always check that the screws, components and wiring have been correctly reinstalled. Make sure that the area around the serviced part has not been damaged.
4. Check the insulation between the blades of the AC plug and accessible conductive parts (examples: metal panels, input terminals and earphone jacks).
5. Insulation Checking Procedure: Disconnect the power cord from the AC source and turn the power switch ON. Connect an insulation resistance meter (500 V) to the blades of the AC plug. The insulation resistance between each blade of the AC plug and accessible conductive parts (see above) should be greater than 1 megohm.
6. Always connect a test instrument's ground lead to the instrument chassis ground before connecting the positive lead; always remove the instrument's ground lead last.

1-3. Electrostatically Sensitive Devices (ESD) Precautions

Some semiconductor (solid state) devices can be easily damaged by static electricity. Such components are commonly called Electrostatically Sensitive Devices (ESD). Examples of typical ESD are integrated circuits and some field-effect transistors. The following techniques will reduce the incidence of component damage caused by static electricity.

1. Immediately before handling any semiconductor components or assemblies, drain the electrostatic charge from your body by touching a known earth ground. Alternatively, wear a discharging wrist-strap device. To avoid a shock hazard, be sure to remove the wrist strap before applying power to the LED/LCD TV.
2. After removing an ESD-equipped assembly, place it on a conductive surface such as aluminum foil to prevent accumulation of an electrostatic charge.
3. Do not use freon-propelled chemicals. These can generate electrical charges sufficient to damage ESDs.
4. Use only a grounded-tip soldering iron to solder or desolder ESDs.
5. Use only an anti-static solder removal device. Some solder removal devices not classified as "anti-static" can generate electrical charges sufficient to damage ESDs.
6. Do not remove a replacement ESD from its protective package until you are ready to install it. Most replacement ESDs are packaged with leads that are electrically shorted together by conductive foam, aluminum foil or other conductive materials.
7. Immediately before removing the protective material from the leads of a replacement ESD, touch the protective material to the chassis or circuit assembly into which the device will be installed.
Caution: Be sure no power is applied to the chassis or circuit and observe all other safety precautions.
8. Minimize body motions when handling unpackaged replacement ESDs. Motions such as brushing clothes together, or lifting your foot from a carpeted floor can generate enough static electricity to damage an ESD.

1-4. Installation Precautions

1. For safety reasons, more than a people are required for carrying the product.
2. Keep the power cord away from any heat emitting devices, as a melted covering may cause fire or electric shock.
3. Do not place the product in areas with poor ventilation such as a bookshelf or closet. The increased internal temperature may cause fire.
4. Bend the external antenna cable when connecting it to the product. This is a measure to protect it from being exposed to moisture. Otherwise, it may cause a fire or electric shock.
5. Make sure to turn the power off and unplug the power cord from the outlet before repositioning the product. Also check the antenna cable or the external connectors if they are fully unplugged. Damage to the cord may cause fire or electric shock.
6. Keep the antenna far away from any high-voltage cables and install it firmly. Contact with the highvoltage cable or the antenna falling over may cause fire or electric shock.
7. When installing the product, leave enough space (0.4m) between the product and the wall for ventilation purposes. A rise in temperature within the product may cause fire.

2. Product specifications

2-1. Feature & Specifications

Model	UE22D5003BW			
Feature				
<ul style="list-style-type: none"> ▶ DTV/ATV, 2-HDMI, 1-SCART, 1-USB2.0 ▶ Brightness : 480 cd/m² ▶ High Contrast Ratio : 6,000 :1 ▶ Response Time : 8.5 ms 				
Specifications				
Item	Description			
LCD Panel	22 inch FHD			
Scanning Frequency	Horizontal : 50 kHz ~ 75 kHz (Automatic) Vertical : 47 Hz ~ 63 Hz (Automatic)			
Display Colors	16.7M color			
Maximum resolution	Horizontal : 1920 Pixels Vertical : 1080 Pixels			
Input Signal	Analog 0.7 Vp-p ± 5% positive at 75Ω , internally terminated			
Input Sync Signal	H/V Separate, TTL, P. or N.			
Maximum Pixel Clock rate	80 MHz			
Active Display Horizontal/Vertical	476.64(H) x 268.11(V) mm			
AC power voltage & Frequency	AC 110 V ~ 220 V, 60 Hz			
Power Consumption	Under 110 W (Under 0.3 W, Stand by)			
Dimensions Set (W x D x H)	515.8 x 124 x 350.0 mm_with stand 515.8 x 39.9 x 315.6 mm_without stand			
Weight	3.5 kg_with stand 3.4 kg_without stand

2-4. New Features explanation

2-4-1. My Contents

■ Using the My Contents

Enjoy photos, music and/or movie files saved on a USB Mass Storage Class (MSC) device and/or your PC.

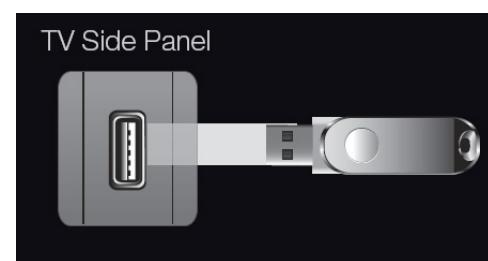

1. Press the **CONTENT** button to select **My Contents**.
2. Press **▲/▼** button to select desired menu (**Videos**, **Photos**, **Music**), then press the **ENTER** button.

* It may differ depending on the model.

■ Connecting a USB Device

1. Turn on your TV.
2. Connect a USB device containing photo, music and/or movie files to the USB jack on the side of the TV.
3. When USB is connected to the TV, popup window appears. Then you can select **Connected Device**.

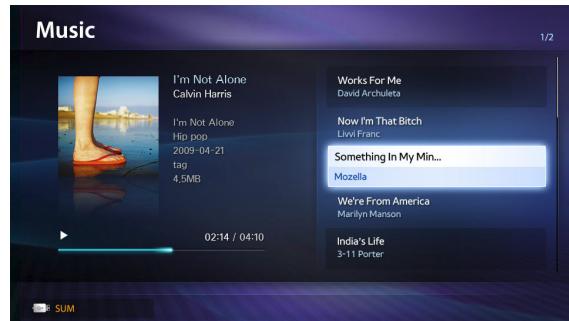

* It may differ depending on the model.

- It might not work properly with unlicensed multimedia files.
- Need-to-Know List before using **My Contents**.
 - MTP (Media Transfer Protocol) is not supported.
 - The file system supports FAT16, FAT32 and NTFS.
 - Certain types of USB Digital camera and audio devices may not be compatible with this TV.
 - **My Contents** only supports USB Mass Storage Class (MSC) devices. MSC is a Mass Storage Class Bulk-Only Transport device. Examples of MSC are Thumb drives, Flash Card Readers and USB HDD (USB HUB are not supported). Devices should be connected directly to the TV's USB port.
 - Before connecting your device to the TV, please back up your files to prevent them from damage or loss of data. SAMSUNG is not responsible for any data file damage or data loss.
 - USB (HDD) is not supported. **for LED 4000 series**
 - Connect a USB HDD to the dedicated port, USB 1 (HDD) port. **for LED 5000 series**
 - Do not disconnect the USB device while it is loading.
 - The higher the resolution of the image, the longer it takes to display on the screen.
 - The maximum supported JPEG resolution is 15360X8640 pixels.
 - For unsupported or corrupted files, the "Not Supported File Format" message is displayed.
 - If the files are sorted by Basic View, up to 1000 files can be displayed in each folder.
 - MP3 files with DRM that have been downloaded from a non-free site cannot be played. Digital Rights Management (DRM) is a technology that supports the creation, distribution and management of the content in an integrated and comprehensive way, including the protection of the rights and interests of the content providers, the prevention of the illegal copying of contents, as well as managing billings and settlements.
 - If more than 2 PTP devices are connected, you can only use one at a time.
 - If more than two MSC devices are connected, some of them may not be recognized. A USB device that requires high power (more than 500mA or 5V) may not be supported. If an over-power warning message is displayed while you are connecting or using a USB device, the device may not be recognized or may malfunction.
 - If the TV has been no input during time set in Auto Protection Time, the Screensaver will run.
 - The power-saving mode of some external hard disk drives may be released automatically when connected to the TV.
 - If a USB extension cable is used, the USB device may not be recognized or the files on the device may not be read.
 - If a USB device connected to the TV is not recognized, the list of files on the device is corrupted or a file in the list is not played, connect the USB device to the PC, format the device and check the connection.
 - If a file deleted from the PC is still found when **My Contents** is run, use the "Empty the Recycle Bin" function on the PC to permanently delete the file.

■ Music

01. Playing Music

1. Press the **◀/▶/▲/▼** button to select the desired Music in the file list.
2. Press the **ENTER**  button or **▶ (Play)** button.
 - You can use **◀ (REW)** and **▶ (FF)** buttons during playback.

-  Only displays the files with MP3 and PCM file extension. Other file extensions are not displayed, even if they are saved on the same USB device.
-  If the sound is abnormal when playing MP3 files, adjust the **Equalizer** in the **Sound** menu. (An over-modulated MP3 file may cause a sound problem.)

02. Playing selected music

1. Press the **C (Edit Mode)** button.
2. Select the desired music.
 - The check box appears to the left of the selected files.
3. Press the **TOOLS** button and select **Play Selected Contents**.
 - You can select or deselect all music pressing the **Select All/Deselect All**.

■ Photos

01. Viewing a Photo (or Slide Show)

1. Press the **◀/▶/▲/▼** button to select the desired Music in the file list.
2. Press the **ENTER** button or **▶ (Play)** button.
 - When a selected photo is displayed, press the **ENTER** button to start the slide show.
 - During the slide show, all files in the file list will be displayed in order.

- ☞ When you press the **▶ (Play)** button in the file list, slide show will be started immediately.
- ☞ Music files can be automatically played during the Slide Show if the **Background Music** is set to **On**.
- ☞ The **BGM Mode** cannot be changed until the BGM has finished loading.

2-4-2. e-Manual

■ How to view the e-Manual

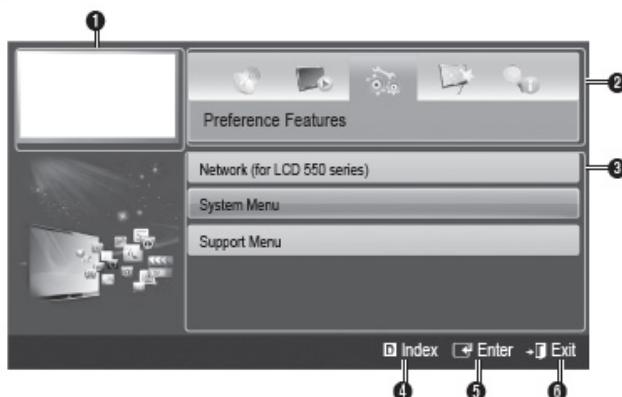

Press the **E-MANUAL** button on your remote. Move the cursor using up/down/right/left buttons to highlight a category, then a topic, and then press the **ENTER** button. The e-Manual displays page you want to see.

MENU → **Support** → **e-Manual** → **ENTER**

If you want to return to e-manual, press the **E-MANUAL** button on remote.

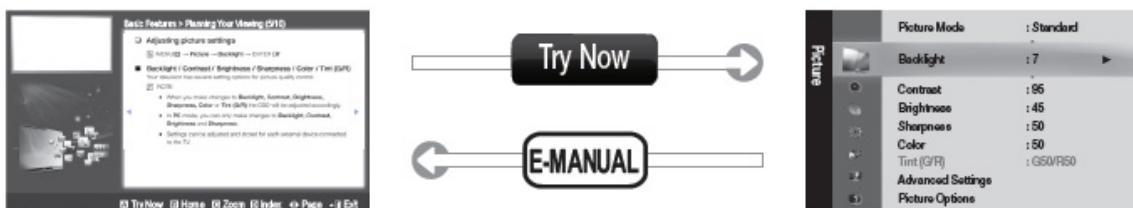

It is not available to connect **Try now** directly in the external input source.

Screen Display

- ① Currently displayed video, TV program, etc.
- ② The category list. Press **◀** or **▶** button to select category you want.
- ③ Displays the sub-menu list. Use the arrow buttons on your remote to move the cursor. Press **ENTER** button to select the sub-menu you want.
- ④ **Index**: Displays the index screen.
- ⑤ **Enter**: Selects a category or sub-menu.
- ⑥ **Exit**: Exit the e-Manual.

How to toggle between an e-Manual topic and the corresponding OSD menu(s).

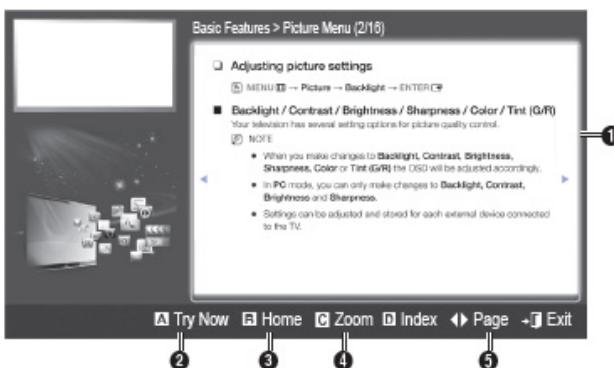

Method 1

1. If you want to use the menu that corresponds to an e-Manual topic, press the red button to select **Try Now**.
2. To return to the e-Manual screen, press the **E-MANUAL** button.

Method 2

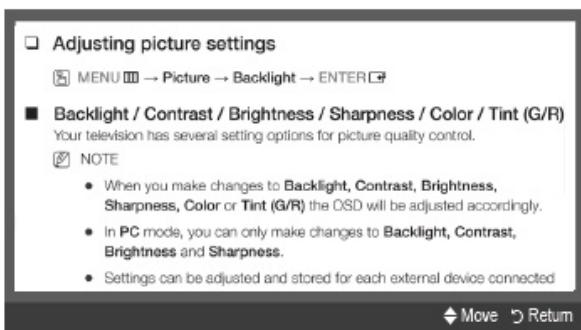

1. Press the **ENTER** button when a topic is displayed. "Are you sure?" appears. Select **Yes**, and then press the **ENTER** button. The OSD window appears.
2. To return to the e-Manual screen, press the **E-MANUAL** button.

Viewing the Contents

- ① **Contents Area:** Contains the topic contents, if you selected a sub-menu. To move previous or next page, press the **◀ / ▶** button.
- ② **Try Now:** Displays the OSD menu that corresponds to the topic. To return to the e-Manual screen, press the e-Manual button.
- ③ **Home:** Moves to the e-Manual home screen.
- ④ **Zoom:** Magnifies a screen. You can scroll through the magnified screen by using **▲ / ▼** buttons.
- ⑤ **◀▶ (Page):** Moves to previous or next page.

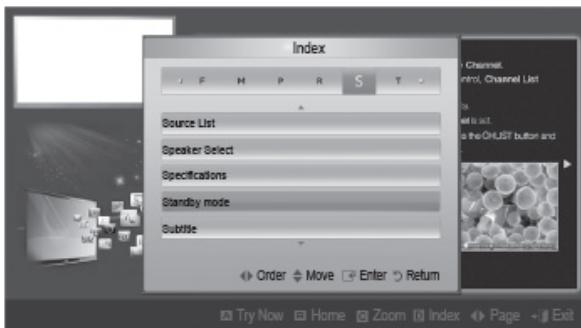

Using the Zoom mode

Select the **Zoom**, and then press **ENTER** to magnify the screen. You can scroll through the magnified screen by using the **▲** or **▼** buttons.

- To return to the screen to normal size, press the **RETURN** button.

How to search for a topic on the index page

1. To search for a topic, press the left or right arrow button to select a letter, and then press **ENTER**. The Index displays a list of topics and keywords that begin with the letter you selected.
2. Press the up or down arrow button to select a topic or keyword, and then press the **ENTER** button.
3. The e-Manual page with the topic appears.

To close the Index screen, press the **RETURN** button.

3. Disassembly and Reassembly

This section of the service manual describes the disassembly and reassembly procedures for the LED/LCD TV.

⚠ WARNING: This LED/LCD TV contains electrostatically sensitive devices. Use caution when handling these components.

3-1. Disassembly and Reassembly

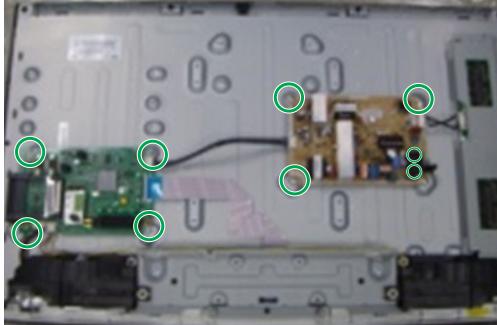

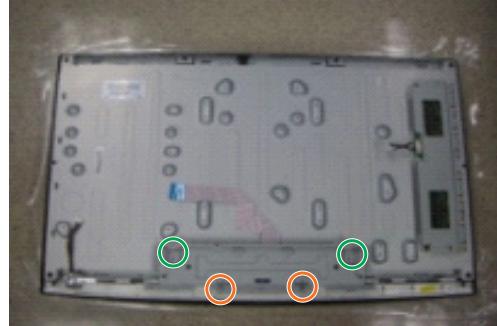

⚠ Cautions:

1. Disconnect the LED/LCD TV from the power source before disassembly.
2. Follow these directions carefully; never use metal instruments to pry apart the cabinet.

4. Troubleshooting

4-1. Troubleshooting

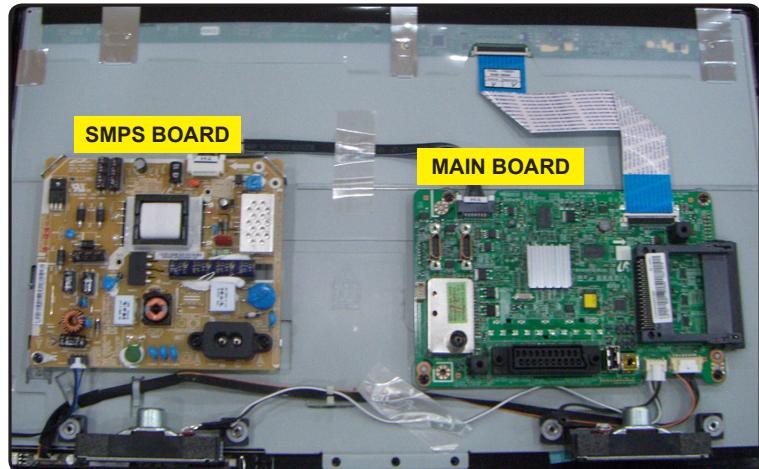

4-1-1. Previous check

1. Check the various cable connections first.
 - Check to see if any cables are damaged or burnt.
 - Check to see if there is a disconnected or loose cable connection.
 - Check to see if the cables are connected according to the connection diagram.
2. Check the power input to the Main Board.

4. Troubleshooting

■ WAVEFORMS

4-2. Alignments and Adjustments

4-2-1. General Alignment Instruction

1. Usually, a color LED/LCD TV needs only slight touch-up adjustment upon installation.
Check the basic characteristics such as height, horizontal and vertical sync.
2. Use the specified test equipment or its equivalent.
3. Correct impedance matching is essential.
4. Avoid overload. Excessive signal from a sweep generator might overload the front-end of the TV.
When inserting signal markers, do not allow the marker generator to distort test result.
5. Connect the TV only to an AC power source with voltage and frequency as specified on the backcover nameplate.
6. Do not attempt to connect or disconnect any wire while the TV is turned on.
Make sure that the power cord is disconnected before replacing any parts.
7. To protect against shock hazard, use an isolation transformer.

4-3. Factory Mode Adjustments

4-3-1. Entering Factory Mode

To enter 'Service Mode' Press the remote -control keys in this sequence :

- If you do not have Factory remote - control

- If you have Factory remot - control

4-3-2. How to Access Service Mode

Using the Customer Remote

1. Turn the power off and set to stand-by mode.
2. Press the remote buttons in this order; POWER OFF- INFO - MENU - MUTE to turn the set on.
3. The set turns on and enters service mode. This may take approximately 20 seconds.
4. Press the Power button to exit and store data in memory.
- If you fail to enter service mode, repeat steps 1 and 2 above.
5. Initial SERVICE MODE DISPLAY State

4-4. White Balance - Calibration

4-4-1. White Balance -Calibration

4-4-2. White Balance - Adjustment

4-5. White Ratio (Balance) Adjustment

1. You can adjust the white ratio in factory mode (1:Calibration, 3:White-Balance).
2. Since the adjustment value and the data value vary depending on the input source, you have to adjust these in CVBS, Component 1 and HDMI 1 modes.
3. The optimal values for each mode are configured by default. (Refer to Table 1, 2)
It varies with Panel's size and Specification.

- Equipment : CS-210
- Pattern: MIK K-7256 #92 "Flat W/B Pattern" as standard
- Use other equipment only after comparing the result with that of the Master equipment.
- Set Aging time : 60min ↑
- Calibration and Manual setting for WB adjustment.

HDMI : Calibration at #24 Chessboard Pattern → Manual adjustment #92 pattern (720p)

COMP: Calibration at #24 Chessboard Pattern → Manual adjustment at #92 pattern (720p)

CVBS: Calibration at #24 Chessboard Pattern → Manual adjustment at #92 pattern (PAL)

- If finishing in HDMI mode, adjustment coordinate is almost same in AV/COMP mode.

- White Balance Manual Adjustment

P-Mode	Adjustment Coordinate				
		x	y	Y (Luminance)	T(K) + MPCD
CVBS (PAL)	H/L	272	278	- (Sub_CT:130)	12,000 (± 0)
	L/L	272	278	12.6cd/m ² (3.7 Ft)	12,000 (± 0)
COMP (720P)	H/L	272	278	- (Sub_CT:130)	12,000 (± 0)
	L/L	272	278	13.0cd/m ² (3.8 Ft)	12,000 (± 0)
HDMI (720P)	H/L	272	278	- (Sub_CT:130)	12,000 (± 0)
	L/L	272	278	13.0cd/m ² (3.8 Ft)	12,000 (± 0)

- Adjustment Specification

White Balance : High light (± 1), Low light (± 3)

Luminance : High light (Don't care), Low light (± 0.2 Ft/L)

4-6. Servicing Information

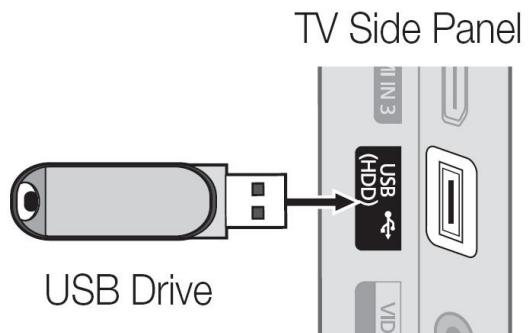

4-6-1. USB Download Method (Main SW & e-Manual)

Samsung may offer upgrades for TV's firmware in the future.

Upgrades will be possible by connecting a USB drive to the USB port located on your TV.

1. Insert a USB drive containing the firmware ([T-MSU4DEUC](#)) upgrade into the USB port on the rear of the TV.
2. Press the **MENU** button to display the menu. Press the **▲** or **▼** button to select "Support", then press the **ENTER** button.
3. Press the **▲** or **▼** button to select "Software Upgrade", then press the **ENTER** button to select "By USB". The message "Scanning for USB. It may take up to 1 minute." is displayed.
4. The message "Upgrade version XXXX to version XXXX? The system will be reset after upgrade." is displayed. Press the **◀** or **▶** to select the "OK", then press the **ENTER** button.

Please be careful to not disconnect the power or remove the USB drive while upgrades are being applied. The TV will turn off and turn on automatically after completing the firmware upgrade. Please check the firmware version after the upgrades are complete. When software is upgraded, video and audio settings you have made will return to their default (factory) settings. We recommend you write down your settings so that you can easily reset them after the upgrade.

4-7. How To Upgrade Sub Micom

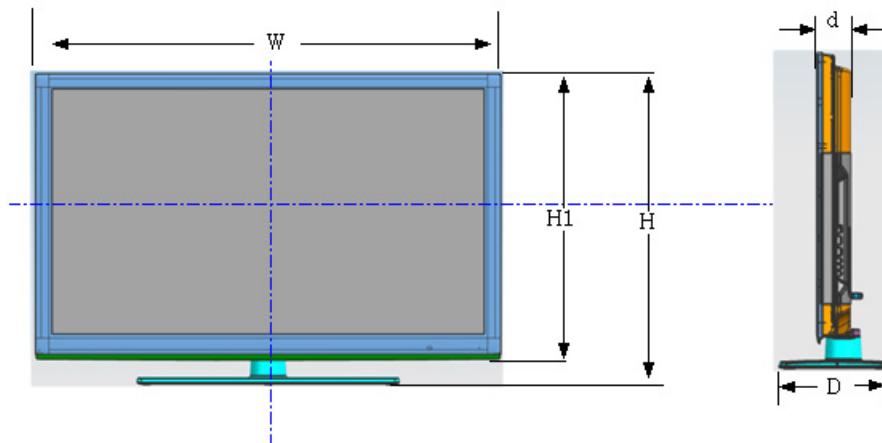

4-7-1. Sub S/W (in Factory mode)

If you don't have DDC Manager, Use this method.

1. Into the Factory Mode.
2. Select "SVC". (Use ► button.)
3. Select "MICOM UPGRADE off". (use ► button.)
4. If message change from "off" to "wait", TV is upgrading Sub S/W. (It takes about 5 min.)
5. If update completes, TV set will booting automatically.
